## Ritherdon SecuriBox – Logbook Holder

---

This version of the popular Ritherdon SecuriBox has been designed specifically for the storage of A4 documents, such as lift maintenance records and fire registers.

Sturdily manufactured from fully welded 1.5mm steel, the cabinet is powder painted for added durability – beige is the standard colour, but we are happy to quote for alternative shades.

The door of the SecuriBox can be screen-printed according to your requirements – an example is shown in the above photograph.

A radial pin tumbler lock with more than 2000 key differs provides security, and two keys are supplied with each cabinet.

The SecuriBox is quickly and easily fitted to any flat surface.

Dimensions: 330mm high x 300mm wide x 80mm deep.
