

# Electrical Equipment Enclosures

Manufacturing for over 100 years, Ritherdon and Co are well established in supplying enclosures to the road traffic industry and have been working closely with the electricity supply industry for several decades.

- Specialists in stainless steel enclosure fabrication.
- **First** to supply a standard range of stainless feeder enclosures to the road traffic industry.

Stainless steel traffic equipment cabinet

Aluminium cabinet for counting equipment

Power supply and metering for traffic signal equipment

Galvanized Highways Agency 609D cabinet

Industrial power supply and metering panel, housed in a plastic box

- Enclosures pre-wired to customer requirements.

- Capacity to work in any sheet metal and to supply pre-wired plastic enclosures.

## Look for our pillars and cabinets around:

Greater Manchester  
Glasgow  
Leeds  
Sheffield  
Gateshead

and London (supplying to Transport for London)

plus many other UK cities and towns.

R150 Service Pillar

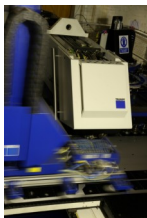

R460 pillar in Manchester

Type A TFL Metering Pillar

With their high quality design and finish, as well as the  oval on the front, our enclosures are quite distinctive.

## Now we are bringing a new approach to supplying enclosures to the Rail Industry

**Please contact us for more information on our range or to ask for a quotation for your enclosures.**
