

Meter Box Repair Replacement Door and Frame Units

**DESIGNED TO MAKE REPAIRING DAMAGED METER BOXES
EASY, FAST AND COST EFFECTIVE**

No need to have the meter disconnected and reconnected by the utility company.

Designed to slide over and fix to the meter box, even with a damaged frame.

Much more secure than replacing damaged doors with more plastic.

Much faster to fit (minutes) than having to replace a whole box (hours + connection fee).

So, as all the old GRP is covered up with powder-coated steel, you have a much better-looking, secure meter box, after just a few minutes work.

We have a very comprehensive range of doors and frames - including front-fixing units - to repair every type of meter box.
